

THE INVENTORY OF BLAGOJEVICH WIRETAPS

The Sun-Times reports yet more wiretaps used in the Blagojevich investigation. From the complaint, we knew of:

- Two bugs in Friends of Blagojevich office
- Wiretap on Blagojevich home land line

From the motion to release the wiretaps related to the horse racing scheme, we learned of:

- Wiretap on Lon Monk's cell phone

And this article reports:

- Camera focused on entrance to Friends of Blagojevich office
- Wiretaps on cell phones of three close Blago advisors (this may or may not include the one on Monk)

Recall that when Fitz asked for a 90 day extension, he mentioned the thousands of tapes they had to go through. It sure sounds like thousands to me.
